This project pertains to:

Offices

New approximately 240,000 square foot ten story high rise office building.

Provided lighting design services consisting of selecting fixtures, provided lighting layout, performing point by point calculations and coordinating with the architecture to enhance features such as the central core multi-story open staircase which is the focal point of the core.

Second scope consisted of providing detailed data plans. Plans consisted of showing data outlet location, wireless hub locations, wiring pathways and assigning addresses to each outlet that were keyed back to the punch down racks. Provided MDF and IDF rack layouts and closet layouts.
